

Block Data (Data Element)

Identifying and Definitional Attributes

Item Name:	Block Data
Abbreviation:	
Alternative Name:	
Definition:	A data stream of (x,y) pairs which comprise the block edge. The number of pairs shall be equal to Block Number of Points (300A,0104), and the vertices shall be interpreted as a closed polygon. Coordinates are projected onto the machine socentric plane i
Context:	National Electrical Manufacturers Association Standard
Responsible Organization:	National Electrical Manufacturers Association(NEMA)
Item Type:	Data Element
OID:	
URI:	
Effective Date:	
Until Date:	
Registration Status:	Recorded as of 2006-05-31
Example:	No example available for this data element
Comment:	The datatype for this data element is: DS 2-2n
Change Description:	
Administrative Note:	

Administrative Attributes

Date of Submission:	2006-05-31
Submitting Organization:	Consolidated Health Informatics (CHI)
Responsible Organization:	National Electrical Manufacturers Association (NEMA)

Relational and Representational Attributes

Value Domain Name	Not Provided
Data Type	Not Provided
Representational Form	
Representational Layout	
Minimum Size	
Maximum Size	512
Unit of Measure	Not Provided
Precision	null
Minimum Range	
Maximum Range	
Permissible Values	No Enumerated Values

Alternative Name and Contexts

Alternative Name	Context
